

Partnership Solutions

Child Resistant Packaging

Overview

In December 1970, the U.S. Congress passed the Poison Prevention Packaging Act with the goal of reducing the risk of poisoning children via consumption of harmful household substances, pesticides, or prescription medications.

In 2017, JohnsByrne developed the EPIK LOK® solution that conforms to these child-safety requirements.

Our Solution

- Certified child-resistant carton solutions
- Federal child resistant, conforms to act16CFR Part 1700 (Poison Prevention Packaging Act)
- Solutions for medical and recreational products (edibles, concentrates, oils, etc.) and delivery products (pens, cartridges, pipes)
- Sustainable & biodegradable
- Created from 100% recyclable paperboard
- Our latest solution is more cost-effective and offers faster speed-to-market
